DHEA (Dehydroepiandrosterone) is considered to be a natural building block substance within the body. It is a precursor to testosterone and other important hormones. Though DHEA is one of the most abundant hormones within the human body, DHEA levels often decrease with age, but may be replenished through supplementation.

Directions: As a dietary supplement, take one caplet daily. If two caplets are taken, take one in the morning and one in the early evening. This product is intended for adults only and is not recommended for anyone under the age of 30. **KEEP OUT OF THE REACH OF CHILDREN.** Check with your physician before taking this or any dietary supplement, especially if you are pregnant, nursing, taking any medications, have a medical condition, or a history of medical conditions in your family. Store in a cool, dry place. Do not refrigerate. Discontinue use if you experience any adverse effects. This is a natural product and its appearance may vary. May be packaged in an oversized bottle to accommodate necessary labeling information.
