

PRODUCT BENEFITS: Melatonin, a natural lipophilic hormone secreted by the pineal gland in the brain, is classified as an indoleamine. Closely involved in the natural sleep cycle, Melatonin can help support restful sleep patterns.* Melatonin may be appropriate for people experiencing occasional sleeplessness, those with jet lag or those wanting to promote sound, quality sleep.* The positive effects of Melatonin are most likely mediated through its involvement with membrane-bound receptors located in the suprachiasmatic nucleus, the pars tuberalis, and other brain regions.*

Directions: For adults, take one (1) tablet at bedtime as Melatonin may produce drowsiness or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.
