

Suggested Usage: Take 2 capsules daily, preferably with food.

Ipriflavone is a derivative of naturally occurring soy isoflavones that has been in use by humans for more than 50 years. This isoflavone has been scientifically shown to support a proper balance between the processes of bone formation and bone breakdown, which normally occurs in order to accommodate the calcium needs of the body.* Clinical trials have demonstrated that Ipriflavone may help to sustain healthy bone metabolism.*
