Product of New Zealand

XTEND-LIFE™ Omega 3 / DHA Fish oil is a unique blend of 50% NATURAL oil extracted from Hoki (New Zealand Whiting), and 50% molecularly distilled, concentrated tuna oil.

The Hoki oil used in this product comes from the pristine waters of the Southern Ocean off New Zealand and is one of the few oils in the world that has full traceability (from the boat to the bottle).

The tuna oil component goes through a unique proprietary process (in addition to molecular distillation) resulting in a level of purity rarely achieved in other fish oils.
