Product of New Zealand

XTEND-LIFE™ Omega 3 / DHA Fish Oil PREMIUM is a unique blend of 50% New Zealand NATURAL HOKI oil (New Zealand Whiting) and 50% molecularly distilled, concentrated tuna oil plus NATURAL Astaxanthin and Lycopene.

The Hoki oil (New Zealand Whiting) used in this product comes from the pristine waters of the Southern Ocean off New Zealand and is one of the few oils in the world that has full traceability (from the boat to the bottle). The tuna oil component goes through a unique proprietary process (in addition to molecular distillation) resulting in a level of purity rarely achieved in other fish oils.

The addition of natural Astaxanthin and Lycopene to this fish oil provides unrivalled health benefits* including healthier, more attractive looking skin*
