

SAMe is found in every living being. It is an important physiological agent synthesized by the body, and it is involved in over 40 biochemical reactions, some of which effect:

MOOD

SAMe & EMOTIONAL WELL-BEING

SAMe is essential to the manufacture of many important brain compounds such as neurotransmitters and phospholipids, which are critical for maintaining healthy mood and emotional well-being.*

JOINTS

SAMe & JOINT MOBILITY

Clinical studies indicate that SAMe may play an important role in the manufacture of cartilage and that SAMe helps produce proteoglycans, essential components in healthy joint function and mobility.*

LIVER

SAMe & LIVER FUNCTION

SAMe is involved in many processes of the liver. SAMe is essential to maintaining glutathione levels, which is critical for proper liver function.*

As people age, SAMe levels can decrease. SAMe supplementation may be an important factor in maintaining mobility and a healthy body and mind.

NutraLife SAMe

NutraLife SAMe is the same form of SAMe that has been available in Europe for over two decades. NutraLife offers the only form of SAMe with 20 years of historical data for both effectiveness and safety. NutraLife SAMe is manufactured and packaged with the highest quality and safety standards.
