SUGGESTED USAGE: Take 1 capsule 1 to 3 times daily as needed. For intensive use, take up to 8 capsules daily under the supervision of a healthcare practitioner.

HOW IT WORKS: Acetyl-L-Carnitine (ALC) is a naturally occurring component of fat metabolism and cellular energy production.* ALC readily crosses the blood-brain barrier and promotes healthy nerve cell function by maintaining normal mitochondrial bioenergetics, stabilizing cell membranes, and contributing to the production of acetylcholine, an important neurotransmitter that plays a role in learning and memory.* ALC also supports the brain's natural defenses against free radical attack.*

CAUTIONS/INTERACTIONS: ALC may interact with anticoagulant medications. If you are pregnant/nursing, taking medication, or have a medical condition, consult your healthcare practitioner before taking this product. Some pharmaceutical medications may increase the need for ALC, including AZT, certain antibiotics, isotretinoin, and some anti-seizure medications (carbamazepine, phenobarbital, phenytoin, and valproic acid).
