PS 200 PHOSPHATIDYL SERINE

BRAIN AND NERVOUS SYSTEM SUPPORT
STRESS • MEMORY • MOOD

DIETARY SUPPLEMENT

240 Easy-to-Swallow Capsules

Andrew Lessman's PHOSPHATIDYL SERINE 200 provides an ultra-high potency source of the brain's most important phospholipid. **Phosphatidyl Serine (PS)** is a vital part of all cell membranes; however, it is in the brain where it is most highly concentrated and its benefits are therefore most apparent. Unfortunately, there are no good dietary sources of **PS**, so its independent benefits are only available via supplementation. Given **Phosphatidyl Serine's** high concentration in the brain, it is not surprising that **PS** plays a vital role in normal brain structure and function. **PS** is also essential for the production and release of neurotransmitters – those vital molecules that are required for all brain functions, such as thought, memory and concentration. **PS** has also been shown to help support positive mood and a healthy response to certain forms of stress. Life can often seem to be nothing more than a series of stressful experiences and it is often said that our ability to cope with that stress defines the quality of our life, particularly as we age. Our **Phosphatidyl Serine 200** provides a high potency natural tool to help promote our body's healthy, positive response to stress while supporting healthy brain function, including positive mood and mental clarity.
