DARK MATTER™ Proprietary Blend (Patent Pending)

The Ultimate Post Workout Muscle Growth Accelerator™: 60g †

WaxiMAX™-C3G: Low Viscosity High Molecular Weight Osmotic Waxy Maize Starch with Molecular Dispersion Technology
Waxy Maize, Maltoplex-18™ Glucose Polymer, Dextrose, C3G anthocyanidins

HydroSIZE™: Multi-Phase Creatine Transport and Cell Volumizing Matrix
InstaPeak™ (Instant Acting Peak Plasma Concentration Creatine Pyruvate), IntraPhase™ (Glucose Bound Creatine Gluconate), MicroTein™ (Microencapsulated Sustained Release Creatine Monohydrate), Glycerol Monostearate

ProSYNTHAGEN™: Protein Synthesis Accelerator (Dual Portal Anabolic Amino Acid Infusion)
Free Form Infusion (L-Leucine, L-Lysine, L-Phenylalanine, L-Threonine, L-Valine, L-Histidine, L-Isoleucine, L-Methionine), **Leucrose™** Peptide Infusion (Leucine-Alanine DiPeptide)

† Daily value not established. Percent Daily values are based on a 2,000 calorie diet.

Other ingredients: Black rice extract, lecithin, citric acid, malic acid, natural and artificial flavors, silica, red #40, blue #1, acesulfame potassium, sucralose.

Directions: DARK MATTER is your Ultimate Post Workout Muscle Growth Accelerator designed to be taken immediately after your workout before you consume any other shake or meal. All other substances will only slow down the precise nutrient infusion of the High Velocity nano-physic particals in Dark Matter, shorten your anabolic window and impede maximum muscle growth and recovery.*

Add 2 scoops to 20oz of water in a glass or shaker bottle immediately after training. Stir or shake vigorously. Any other post-workout shake or meal may be taken 1 hour later.

- Keep out of reach of children.
- Store at 15-30°C (59-86°F).
- Protect from heat, light and moisture.
- Do not purchase if seal is broken.

DARK MATTER™

The Ultimate Post Workout Muscle Growth Accelerator*

■ Absorbs **Faster Than Whey Isolate***

■ 600% Increase in Protein Synthesis—Equal to **40 Grams of Protein***

■ Dramatically **Spikes Insulin** with **WaxiMAX-C3G™***

■ Multi-Phase **HydroSIZE™ Creatine Transport***

■ Replenishes **Glycogen** and Increases **Cell Volume***

2.6lbs (1200g)
Dietary Supplement

Fruit Punch

The Ultimate Post Workout Muscle Growth Accelerator*

*Faster Absorption Than Whey—Stimulates Protein Synthesis—Dramatically Spikes Insulin—Maximizes Creatine Uptake and Glycogen Replenishment**

Don't waste another workout! If you want to start gaining serious size, chug down some DARK MATTER and introduce your muscles to a new frontier of muscle growth as you enter the ANABOLIC AXIS. The biggest opportunity to stimulate muscle growth is immediately after your workout. The faster you can get critical nutrients into your bloodstream and muscles, the better. DARK MATTER employs new technologies and compounds which allow for the fastest possible nutrient uptake and sparks a synergistic anabolic reaction in which insulin levels simultaneously peak with amino acid, creatine and glycogen transport at the Anabolic Axis to trigger extreme muscle growth and speed recovery.*

ProSYNTHAGEN™: Increases Protein Synthesis Faster Than Whey

ProSynthagen's unique combination of essential free form amino acids greatly stimulates protein synthesis faster than whey isolate. ProSynthagen isn't just fast, it's powerful too—each serving stimulates protein synthesis equivalent to 40 grams of protein. Additionally, ProSynthagen's amino acid matrix is fine-tuned with "Dual Portal Transport" for even faster and greater intestinal uptake by combining these powerful free form aminos with Leucrose™, an exclusive newly developed leucine-alanine dipeptide. Leucrose™ also increases anabolic activity by regulating protein synthesis and sparing critical Branched Chain Amino Acids. These unique characteristics give ProSynthagen a much higher Protein Synthesis Score than any other protein source, which will result in the greatest muscle building effects.*

WaxiMAX™-C3G: Dramatically Spikes Insulin and Replenishes Glycogen!

WaxiMax-C3G is a tri-polymer carbohydrate matrix comprised of low viscosity, high molecular weight, osmotic waxy maize starch, Maltoplex-18 glucose polymer and dextrose. This matrix allows for fast gastric emptying, a quick, powerful insulin spike and maximum glycogen replenishment. WaxiMax-C3G's tri-polymer matrix was developed to deliver the precise infusion to illicit the best insulin response to open the anabolic window faster and keep it open longer. Amazingly, this tri-polymer greatly increases insulin levels with only 10 grams of sugar—a huge benefit over most creatine products and post workout formulas. And to make things even better and more anabolic, DARK MATTER contains a patented concentrated source of C3G (cyanidin-3-glucoside), which improves insulin sensitivity for increased nutrient transport, protein synthesis, creatine/nutrient uptake and glycogen replenishment.*

HydroSIZE™: Multi-phase Creatine Transport & Cell Volumizing Matrix

To complete the anabolic infusion, MHP's research team developed HydroSIZE, which is a multi-source creatine/glycerol complex for the greatest muscle volumizing and bioenergetic creatine loading into muscle tissue. This complex provides an optimal amount of creatine in the form of Creatine Pyruvate and Creatine Gluconate to quickly be transported in tandem with peak insulin levels, amino acids and glycogen at the Anabolic Axis. The inclusion of MicroTein, a microencapsulated sustained release creatine provides a continuous supply of creatine for maximum creatine saturation and cell volumizing.*

High Velocity Nano-Physics: New Technology for Rapid Absorption & BioAvailability

The final step in taking post-workout supplementation into a new anabolic dimension was the development of a new type of nano-technology, called High Velocity Nano-Physics. This technology is based on high velocity particle physics collision of nano-fusible compatible materials. High Velocity Nano-Physics allows for maximum speed, bio-effectiveness and micro-nutrient timing to open the Anabolic window fast and create a synergistic delivery of ProSynthagen, WaxiMax-C3G and HydroSIZE to simultaneously peak at the "Anabolic Axis."*

**Every Workout Ends with DARK MATTER...
Enter the Anabolic Axis for the Most Powerful Anabolic Reaction Ever Experienced!***
