be-DEFINED, be-ENERGIZED, be-ENHANCED...be-HOT!

*In a double-blind, randomized, placebo-controlled cross-over study, 25 subjects exercised on a treadmill on two occasions. On one occasion the subjects took GNC's proprietary thermogenic blend 60 minutes before exercise and on the second occasion, they took a placebo. When the subjects took GNC's proprietary thermogenic blend, they burned three times more calories before, 3% more calories during and 12 times more calories for up to one hour after exercise compared to when they took the placebo. This resulted in an average cumulative total of 276 more calories burned before, during and after exercise compared to placebo.
