

Who Should Take Amplified Maxertion N.O.™?

Amplified Maxertion N.O.™ is designed specifically for the athlete who is striving to achieve maximal exertion. If you need a high performance Nitric Oxide formula with an extra burst of power to get you through your competition, to run one more mile or bench one more set, then this is the product you need.

When Should I Take It?

Amplified Maxertion N.O.™ should be taken daily before exercise.

Better Exercise Performance!

A clinical study has shown that Amplified Maxertion N.O.™ improves power output while delaying muscle fatigue.** This micronized arginine formula:

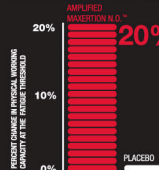

- Increases power output at the onset of fatigue by 20%**
- Delays the onset of neuromuscular fatigue during exercise**
- Increases physical performance**

RESVIDA® SIGNIFICANTLY ENHANCED BLOOD VESSEL DILATION*

*In a randomized, double-blind, placebo controlled cross over study, 19 volunteers consumed 3 doses of ResVida® (30mg, 90mg, 270mg) and a placebo at weekly intervals. Flow-mediated dilation (FMD) of the brachial artery was measured one hour after ingestion of each treatment and was significantly increased at all 3 doses relative to placebo. 30mg of ResVida® demonstrated 2.5% greater increase in FMD relative to placebo.

AMPLIFIED MAXERTION N.O.™ IMPROVES PHYSICAL PERFORMANCE BY 20%

*In a randomized, double blind, placebo controlled study, 50 healthy untrained male volunteers were given Amplified Maxertion N.O.™ or a placebo. Each subject exercised on a cycle ergometer prior to receiving the supplement or placebo and again after the treatment period was finished. Those subjects that supplemented with Amplified Maxertion N.O.™ had a 20% increase in PWCF (physical working capacity at the fatigue threshold) after four weeks of supplementation relative to the placebo group.

Amplified Maxertion N.O.™ – What's the 'pump' All About?

We've taken the pump to a whole new level – new and improved Amplified Maxertion N.O.™, GNC's triple action N.O. pump formula! It features a clinically researched formula proven to intensify your workouts while giving you the extra power to help you push through the wall...going above and beyond your regular workout.** GNC's best N.O. amplifier just got even better with an added blood vessel dilator.

Amplified Maxertion N.O.™ Evolution

It's a fact that when Nitric Oxide is released in the body, blood vessels expand allowing more oxygen and nutrients to surge to each muscle cell. Many supplements tout that they can help you achieve better pumps to your muscles for longer, more efficient workouts. Why is Amplified Maxertion N.O.™ different? It all begins with innovative technology proven to AMPLIFY effects and three vital N.O. potentiating ingredients.

New and Improved Circulatory Pump Blend – Featuring clinically studied ResVida® resveratrol, shown to significantly enhance blood vessel dilation to help facilitate blood flow.* This is important to help drive more oxygen and nutrient-rich blood through the body for more efficient muscle pumps!† This blend also features MegaNatural®-BP*, a clinically studied grape seed extract, that acts as an endothelial modulator to support circulation.*

Micronized Arginine – This superior formula uses MicroSorb™ Amino Technology for enhanced absorption of arginine – a key precursor to Nitric Oxide. MicroSorb™ Amino Technology takes large arginine molecules and pulverizes them into smaller micronized particles. As a result, this potent N.O. activator is easier to absorb and more effective at enhancing your workout.*

PEG-Arginine System – To raise the bar even higher, this formula also boasts a patent-pending PEG-Arginine system designed to further enhance the absorption of N.O. stimulating ingredients and contribute to the clinically proven effects.

It also activates Nitric Oxide synthase, which is the enzyme in the body that dilates blood vessels and ignites N.O. synthesis in the muscles.*
