DNA SERIES - IT'S IN YOU

Customize your supplement stack with the all-new BSN® DNA Series. Each DNA Series product provides versatility to be used with other pre/post-workout supplements to create customized combinations that help you achieve your individual fitness goals..

Glutamine DNA™, when used as directed, at maximum dosage, over time, combined with a healthy diet and regular exercise is designed to support:

- RECOVERY FROM INTENSE EXERCISE*
- MUSCLE PROTEIN DEVELOPMENT*
- GLUTAMINE REPLENISHMENT*

L-Glutamine is the most abundant amino acid in the body and plays an important role in recovery and muscle protein development. During periods of intense exercise, L-Glutamine levels can be depleted which may limit protein synthesis.

Because supplemental L-Glutamine may help support recovery post-exercise, each serving of BSN® Glutamine DNA™ provides 5 grams of micronized L-Glutamine.* Glutamine DNA™ is unflavored, providing versatility to add to your post-workout protein shake or favorite beverage.
