

Tri-MG Accelerator™ - includes beta-alanine and BCAA's for muscle support, as well as clinically studied betaine (Trimethylglycine) to assist in athletic performance.*

N.O. Charge Blend - combines arginine, citrulline and yohimbe with a clinically studied grape seed extract for an intense pre-workout boost. This unique blend was engineered using our new and innovative technology, MicroSorb™ Amino Technology, for superior absorption and increased efficiency. This technology takes the large arginine molecules and reduces them into smaller particles, which in turn facilitates faster absorption in the body.

Creatine Matrix Blend - volumizes muscle cells.* Consists of three forms of creatine, which play an important role in muscle protein synthesis.* This blend features the three amino acids the body uses to make creatine. This blend also includes Guanidinoacetate (GAA) to help support the body's natural production of creatine.*

EFAM (Energizing Fatty Acid Metabolizer Blend) - combines 400 mg of caffeine, MCT's and L-carnitine to generate physical and mental intensity.*

Not only will you see the difference, you will feel the difference with each dose you take.

Who should take Amplified N.O. Loaded™?

So, the question remains – is this a product for you? Well, if you're looking for a product for more explosive performance to give you a stronger competitive edge, then look no further. Amplified N.O. Loaded™ will give you the rush you crave to extend and maximize the efficiency of your workout.*

When do I take it?

Take before exercise to see and feel the results...More reps, longer sets, massive bursts of energy...now that's an AMPlified workout.

Amplified N.O. Loaded™ – What's the 'pump' all about?

Amplified N.O. Loaded is not your typical nitric oxide (N.O.) product – it intensifies your workout with faster N.O. activation, taking you above and beyond, pushing you to the next level. Scientifically engineered to include ingredients of the highest quality that, when combined, create a dynamic nitric oxide experience.

During exercise when your muscles are hard at work, blood vessels expand and nitric oxide is released, allowing blood to surge throughout your body. As blood vessels expand, more blood carrying valuable nutrients surges to the muscles, delivering more nutrients to each muscle cell. When the muscles are able to receive more nutrients quicker, that is when you see outstanding performance.

Arginine is a key ingredient in any N.O. formula, but we don't stop there. GNC's sports nutrition experts and scientific researchers have developed a formula combining arginine with additional N.O. potentiating ingredients to fuel your performance and boost your workouts!*

The Proof is in the Pump

In addition to our innovative technology, our skilled researchers incorporated clinically studied ingredients to give you the ultimate advantage. Clinically studied grape seed extract, MegaNatural®-BP™, acts as a hemodynamic endothelial modulator causing an increase in blood flow to the muscles. This grape seed extract activates nitric oxide synthase, which is the enzyme in the body that dilates blood vessels and ignites N.O. synthesis in the muscles. With an increased blood flow pumping to your muscles, more nutrients are delivered faster, and you will see increases in performance.*

Amplified N.O. Loaded™ Evolution

Amplified N.O. Loaded™ is what the name implies...a loaded formula guaranteed to intensify your workouts like never before! Consisting of four proprietary blends to truly make this product unique – there is no other product like it.
