**Move Better, Feel Better®
with Move Free®**

Instead of just masking your joint discomfort, Move Free® actually promotes long term joint health.

Move Free® Double Strength Provides
Glucosamine HCl 1,500 mg
Chondroitin 1,200 mg
the Amounts Tested by Researchers

Joint Fluid (Hyaluronic Acid)

Glucosamine is a basic building block of joint cartilage, which helps to maintain structural integrity of joints and connective tissues.

Chondroitin is a naturally occurring nutrient found in connective tissue. It is capable of binding water molecules to lubricate, cushion and support joints.

Joint Fluid (Hyaluronic Acid). Synovial fluid is made up of molecules of Hyaluronic Acid. Not all Hyaluronic Acid molecules are the same. Schiff® uses large-sized, high potency, high purity Hyaluronic Acid (Joint Fluid). Hyaluronic Acid (Joint Fluid) in Schiff's Move Free® is similar in molecular size to Hyaluronic Acid in joints. A scientific study concluded that the same form of Hyaluronic Acid as is in Schiff's Move Free® is absorbed and concentrated in joints after oral ingestion. (Balogh, L. et al., J Ag Food Chem 2008)
