Glucosamine
Glucosamine is key for the formation of cartilage, an essential building block of your joints. Glucosamine also supports the mobility and flexibility you want in everyday life.*
Chondroitin
Chondroitin is a building block of cartilage that supports joint strength by helping to resist compression in the joint. Chondroitin attracts fluid to your joints to support cushioning and lubrication.*
Uniflex® [or FruiteX-B Calcium Fructoborate]
Uniflex® is a clinically tested mineral complex that supports joint comfort in as little as 2 weeks.*
Joint Fluid [or Hyaluronic Acid]
Hyaluronic Acid is the same molecule found in healthy joint fluid that supports joint lubrication and smooth movement. As we get older, our levels of HA tend to decrease.*
