

Benfotiamine is a highly bioavailable derivative of thiamin that can support the circulatory and nervous systems. Alpha-Lipoic acid (ALA) is a key factor in the cellular process that metabolizes glucose for energy production. ALA has the capacity to impact heart, eye, and brain health. Benfotiamine + ALA is a winning combination to support healthy aging and to maintain healthy cells in the presence of circulating glucose.

Helps control formation of Advanced Glycation End Products (AGEs)*

Helps support the circulatory and nervous systems*

Helps dual radical-scavenging action to confront oxidative stress*
