Smart Facts

Health experts agree: not all fat is bad for you. Omega-3 fatty acids are considered one of the "good" fats important for cellular, heart and metabolic health.* But getting an adequate amount of fatty acids to support heart health is not easy - especially in today's fast food world.* Salmon Oil contains eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA), two fatty acids that help support and maintain the health of your cardiovascular system.*
