Contains soy ingredients.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Bone health can be dependent on many factors including heredity, diet, exercise and lifestyle. Calcium is the primary mineral responsible for strong bones.* The body also uses Calcium for proper muscle contraction and nerve function.* Because the body cannot produce Calcium, a balanced diet, regular exercise, healthy lifestyle choices and adequate intake of Calcium and Vitamin D can play a role in maintaining optimal bone health.*

**Adequate calcium as part of a healthful diet, along with physical activity, may reduce the risk of osteoporosis in later life.
