DIGESTIVE HEALTH

Nature's Bounty[®] Controlled Delivery Probiotic CD takes advantage of today's nutritional scientific innovation with a targeted approach to digestive health.* We combined our exceptional probiotics with BIO-trac[®] technology. BIO-trac[®] technology is the process of enrobing our probiotics with a vegetarian gel-like substance that protects the ingredients from gastric acid. BIO-trac[®] technology allows the caplet to pass through the digestive tract, and release live organisms within the digestive system.

Nature's Bounty[®] Controlled Release Probiotics

Probiotic Organisms include: L. plantarum, L. acidophilus, L. fermentum, L. rhamnosus, B. bifidum, B. longum

Nature's Bounty[®] Controlled Delivery Probiotic CD is processed in a facility that uses a patented manufacturing process called LiveBac[®]. The LiveBac[®] process of production is designed to deliver high-viability probiotic ingredients and eliminates the need for refrigeration prior to opening. You can feel secure knowing Nature's Bounty[®] Controlled Delivery Probiotic CD is manufactured to the highest quality.
