

Directions: Take one tablet with a meal one to two times daily or as directed by your healthcare practitioner.

Niacin continues to be one of the most studied, and most recommended supplements. Niacin is considered first-line therapy by nearly every panel, including NCEP (The National Cholesterol Education Panel), for improving blood lipids related to cardiovascular health.

XYMOGEN®'s Sustained-Release Niacin, not only maintains the helpful lipid modification seen with instant release forms, it dramatically reduces the flushing effect allowing more people to realize the benefits of niacin. The proprietary wax-coated technology permits a release that is complete in 7-8 hours, considered ideal for a time-release niacin.*
