

Directions: Take one to two softgels twice daily with food or as directed by your healthcare practitioner.

ConjuLean 1000™ is a patented form of Conjugated Linoleic Acid (CLA). The yield of CLA ranges from 75-82% with an average of 78% CLA providing 780 mg pure CLA per capsule. Clinical trials conducted in 1996 demonstrated 3000 mg of CLA per day may reduce body fat while increasing lean muscle mass.

Since then, the results of CLA animal and human studies have demonstrated its many benefits in obesity-related conditions such as Syndrome X and cardiovascular health, as well as in areas of immune function, stress-catabolic response and bone health.

ConjuLean 1000™ is guaranteed to provide the highest levels of pure CLA and those isomers most commonly associated with positive health benefits. The t-10, c-12 isomer has been shown to be important in reducing fat mass and enhancing immune response, while the c-9, t-11 isomer appears to lower triglyceride levels.

While CLA in the diet is found primarily in dairy products and beef fat, **ConjuLean 1000™** is derived from pure, non-GMO safflower oil.*
