

DIM-plus™ Difference

Patented Complex

Contains patented BioResponse-DIM® Complex—an enhanced bioavailability delivery system for diindolylmethane.

Enhanced Absorption

The bioavailability of DIM-plus is superior to regular diindolylmethane and its unstable precursor, indole-3-carbinol (I3C). With DIM-plus you are assured a stabilized and consistent dose of diindolylmethane.

Protectamins® Vegetables

DIM-plus also contains spinach, cabbage and broccoli for additional phytonutrients.

GLUTEN FREE. No sugar, salt, wheat, yeast, dairy products, artificial flavors or preservatives.

BioResponse-DIM® and DIM® are trademarks of BioResponse, LLC. BioResponse-DIM® is a patented, enhanced bioavailability, oral delivery system for diindolylmethane (U.S. patent #6,086,915).

DIM-plus™ Benefits

DIM-plus contains diindolylmethane, a phytonutrient found in cruciferous vegetables including broccoli, Brussels sprouts, cabbage, cauliflower and kale.

Diindolylmethane has unique benefits that support the activity of enzymes that improve estrogen metabolism.*

Research shows diindolylmethane increases the level of "favorable" estrogens (2-hydroxyestrogen) while reducing the level of "less favorable" estrogens (16-hydroxyestrogen).*

Keep out of reach of children. Safety sealed with printed outer shrinkwrap and inner seal. Do not use if either seal is broken or missing. Store in a cool, dry place. Keep bottle tightly closed.
