

SUGGESTED USE: As a dietary supplement, take 1 TBSP post-workout. On non-training days take 1 TBSP at night. No refrigeration needed.

Warnings: Do not use if you are pregnant or nursing. Not intended for any persons under the age of 18. Seek the advice of your healthcare professional if you have any medical condition or are taking any medications. Discontinue use if you are experiencing any side-effects.

Keep lid tightly closed in a cool, dry place away from children.

What is CELL RUSH™? It is a unique formula containing multi-patented Kre-Alkalyn® EFX creatine and Beta Alanine. These two compounds work synergistically to increase cellular energy output while providing added protection from intracellular metabolic waste buildup that ultimately leads to a decrease in performance.

Our advanced pH-Xact™ delivery technology, in a 100% stable liquid-based matrix, provides the fastest possible absorption of these compounds for better recovery, enhanced performance and muscular growth.

The Kre-Alkalyn® EFX Advantage: With its patented pH-Correct Design (#6,399,661), Kre-Alkalyn® EFX is the world's only creatine that reaches muscle cells at full potency. All other creatine based products reside in the unstable pH zone 6.9 or less. Kre-Alkalyn® EFX is elevated to the stabilizing pH zone of 12-14.

pH-Xact™
Delivery Technology

It's not how much you take,
It's how much you absorb.

pH-Xact™ delivery technology ensures optimal bio-availability of our formulas by giving them the precise pH levels necessary to rapidly shuttle nutrients to the bloodstream with maximum potency.
