

Benfotiamine (S-benzoylthiamine-O-mono-phosphate) is a derivative of thiamin (Vitamin B1). Benfotiamine is fat-soluble and more bioavailable than thiamin.* Benfotiamine raises the blood level of thiamin diphosphate (TDP), the most biologically active co-enzyme of thiamin, which is an essential cofactor for three enzymes involved in energy production.*

Helps maintain healthy glucose metabolism*

Helps control formation of Advanced Glycation Endproducts (AGEs)*

Helps support nerve integrity and function*
