

Nattokinase is an enzyme derived from "natto," a traditional fermented soy food popular in Japan. During the natto production process, friendly *Bacillus subtilis* bacteria are boiled and fermented using non-GMO soybeans to produce nattokinase. **Doctor's Best Nattokinase** contains nattokinase enzyme with Vitamin K2 removed. Nattokinase has been shown to decrease plasma levels of fibrinogen and supports a healthy circulatory system.*

Helps support a healthy circulatory system*
