

Support a healthy heart! **Cholesterol Complex with Plant Sterols** is a powerful blend of nutrients designed to naturally support healthy cholesterol levels. This formula includes policosanol, a complex nutrient that has both antioxidant effects and supports liver cholesterol metabolism. Corowise™ plant sterols are natural components found in plants that may help excrete cholesterol from the body. According to the FDA, products containing at least 400 mg per serving of plant sterols and stanols, eaten twice a day with meals for a daily intake of at least 800 milligrams as part of a diet low in saturated fat and cholesterol, may reduce the risk of heart disease.

In conjunction with a healthy diet, Cholesterol Complex with Plant Sterols helps support cholesterol levels already within a normal range.†
