

Best Fisetin Featuring Novusetin™ offers a naturally sourced flavonol that displays positive effects on brain health and cognitive function pathways in pre-clinical research. Fisetin is a bioflavonoid antioxidant that can help maintain glutathione levels and mitochondrial function in the presence of oxidative stress. It has potential to cross the blood brain barrier, which may help maintain neuronal function even in the face of factors that contribute to normal associated decline in brain function. Other than strawberries, fisetin is scarce in fruits and vegetables compared to other flavonoids, making Best Fisetin Featuring Novusetin™ a most reliable source of this powerful antioxidant and potential nootropic.*

Flavonol antioxidant support for healthy aging*
