If you're serious about performance and results, you need the ALL-NEW MuscleTech® Performance Series!

- NO Proprietary Blends
- NO Underdosed Key Ingredients
- NO Banned Substances
- NO Hype
- NO Exceptions

Just the Most Powerful Formulas Available

MASS-TECH® - The Scientifically Superior Mass Gainer

New MASS-TECH® is an advanced muscle mass gainer designed for any individual who has a tough time adding size, is in their bulking phase or wants to break through their strength plateaus. Power-packed with 80 grams of protein and 1010 mass-producing calories when mixed with 2 cups of skim milk, this potentially superior formula is also enhanced with a proven anabolic driver for rapid mass and strength gains!▲

•Better Quality Calories Designed for the Hardgainer

MASS-TECH® is a powerful and scientifically superior weight gainer designed to be taken twice daily. The new, powerful formula now delivers a massive, 1010 calories (when mixed with 2 cups of skim milk) derived from high-quality protein and quickly digested carbohydrates.▲

•More Protein per Serving Than Other Weight Gainers

New and improved formula features an 80-gram multi-phase protein system (when mixed with 2 cups of skim milk), which supplies fast- and slow-digesting proteins. The multi-phase protein system provides critical amino acids to the body at varying speeds.▲

•More BCAAs and L-Leucine per Serving Than Other Weight Gainers

The formula's protein dose supplies a massive 8 grams of L-leucine and 17 grams of BCAAs when mixed with 2 cups of skim milk, which helps fuel your skeletal muscles, preserve muscle glycogen stores and helps to reduce the amount of protein breakdown.▲

•Build More Strength

Unlike other leading gainers that contain little to no creatine, MASS-TECH® delivers a 10-gram clinically validated dose to increase strength fast.▲

•Helps Replenish Glycogen Stores

Supplies 156 grams of carbohydrates when mixed with 2 cups of skim milk through a multi-phase carb complex to both spike insulin, quickly shuttling creatine into the muscle, and promote muscle glycogen replenishment, helping to put the body into an anabolic state.▲

BASED ON RESEARCH AT A LEADING AMERICAN UNIVERSITY

TEST SUBJECTS RAPIDLY ADDED MASS!▲

5x the MASS

CONTROL

†An 8-week study examined the addition of 2,000 calories (over 2,000 calories are found in two servings of Mass-Tech®) each mixed with two cups of skim milk to a high-protein diet containing approximately 2,300 calories and a weightlifting program. On average, subjects gained 6.8 lbs. of mass while control subjects gained 1.3 lbs.*

TEST SUBJECTS INCREASED CHEST & ARM SIZE!▲

ARMS: +0.5 INCHES

CHEST: +1.2 INCHES

WAIST: NO SIGNIFICANT CHANGE

As the same study noted above, test subjects also gained massive size where it matters most - directly on their chest and arms. They gained 1.2 inches on their chest and 0.5 inches on their arms versus the control group who only added 0.5 inches and 0.2 inches.*
