

Best Fully Active B12 provides Methyl-Cobalamin, the most biochemically active form of vitamin B12. Various inherited and lifestyle factors contribute to vitamin B12 deficiencies that impair such fundamental life processes as recycling of homocysteine, a potentially toxic metabolite; nerve cell signaling; mood and memory management; and healthy gene regulation (epigenetics), from pregnancy through old age. **Best Fully Active B12** is vitamin B12 at its best.

Helps correct inherited and lifestyle-related B12 deficiencies*

Supports healthy memory, mood, circulation and well-being*
