

IMPORTANT FACTS YOU SHOULD KNOW

Omega-3 Fish Oil contains EPA and DHA which help support and maintain the health of your cardiovascular system.* Omega-3 fatty acids also help maintain triglyceride levels already in the normal range.* This unique supplement is coated, which means the active ingredients bypass the stomach and are digested in the small intestine, which can minimize the aftertaste. Supportive but not conclusive research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease. One serving of Coated Fish Oil provides 300 mg total of EPA, DHA and other omega-3 fatty acids. See nutrition information for total fat and cholesterol content.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.
