

Best Vein Support contains DiosVein®, used for decades for vascular support in Europe. Derived from sweet orange and rich in bioflavonoids, DiosVein® has been shown in clinical studies to support blood vessel health and promote normal circulatory function.* Further studies have found that diosmin in combination with the flavonoid hesperidin supports healthy venous function.*

Best Vein Support also features MenaQ7™, a long-acting, natural form of vitamin K2 found in the traditional Japanese fermented food, natto. Adequate K2 is important for healthy blood vessel function and MenaQ7™ is a long-acting form shown to support cardiovascular health.*
