

Solgar® N° 7 is the next generation alternative after glucosamine that increases mobility, flexibility and range of motion in sensitive joints.* In this breakthrough formulation, N° 7 brings together bio-active nutrients that work to create a fast acting approach for occasional "twinks" and joint stresses brought on by exercise, sport or physical activity. With increased mobility and flexibility, Solgar® N° 7 can help you to pursue the activities you love and get back on track...fast. Feel the difference for yourself. Solgar® N° 7 shows improvement in joint comfort...within 7 DAYS.*

*Based on two human studies with S-LOXIN Advanced® where subjects rated their joint health over time, subjects' joint health improved within 7 days and continued to improve throughout the duration of the studies.

Active lifestyles can be hard on overworked muscles and even more troublesome for joints. Cardio-activities like running, hiking and even biking can give joints a pounding your body may feel long after. Even with only daily activity, pressure on joints can trigger our body to release those enzymes that may break down collagen and cause healthy joints to lose their own natural cushioning.

Solgar® N° 7 works differently from Glucosamine Chondroitin. While traditional Glucosamine formulas focus on cartilage support, Solgar® N° 7 targets multiple pathways to balance the release of joint enzymes, structurally support collagen building blocks and sensitive joint cartilage...while simultaneously supporting the body's natural range of motion and joint flexibility.* For the first time, natural science at Solgar combines the advanced and naturally sourced bio-activity of S-LOXIN Advanced® AKBA, UC-II® (Type II Collagen) and Ester-C®, with a complex of traditional pepper spices and botanicals. Solgar's advanced bioactives target both structure and function of natural joint motion to help balance out joint stresses, daily wear and tear, and the "overworking" of an active lifestyle.* When stiff joints occasionally say no...Solgar® N° 7 says YES!
