

Chromium is an essential trace mineral required for proper metabolism of carbohydrate, fat and protein, but it is often lacking in the typical diet. Our Chromium supplement utilizes ChromeMate®, a unique oxygen-coordinated niacin-bound chromium complex, to provide a highly bioavailable form of chromium. ChromeMate® has been shown safer and more effective than other forms of chromium tested, including chromium picolinate.†

 ChromeMate® is a registered trademark of InterHealth, N.L.
