

Iron, folic acid, vitamins B6 and B12 -- all components of our Iron Complex -- are essential for formation of healthy red blood cells. Vitamin C works synergistically with these nutrients, supporting their assimilation. Our formula combines iron with these vitamins, providing a powerful supplement to support production of hemoglobin.†

This Iron Complex is manufactured using a state-of-the-art Prolonged Release beadlet system. Each capsule is designed to release nutrients in a controlled pattern (over approximately 3-6 hours) to promote optimal assimilation.
