

Alpha Lipoic Acid is a vitamin-like antioxidant that contains antioxidant properties that help fight free radicals in the body.* Free radicals may contribute to the premature aging of cells. As an antioxidant, Alpha Lipoic Acid helps neutralize free radicals in both the water-soluble and fat-soluble compartments in the cell, and supports the regeneration of glutathione — one of the body's primary antioxidants.*

Directions: For adults, take one (1) capsule twice daily, preferably with meals. As a reminder, discuss the supplements and medications you take with your health care providers.
