

Saw Palmetto berries contain a variety of fatty acids and sterols that help maintain prostate and male urinary system health. A healthy prostate is very important for the proper function of the male urinary and reproductive systems.

Saw Palmetto is used extensively in Europe where important scientific research has shown positive results. Our product conforms to dosage and mode of administration as established by the German Commission E monograph and contains standardized Saw Palmetto (*Serenoa repens*) extract from the highest grade whole, mature ripe fruit.[†]

The Ultimate Extract® process makes our Saw Palmetto easier to digest and more available than plain powder, resulting in a premium Saw Palmetto supplement.
