\*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Bone health can be dependent on many factors including heredity, diet, exercise and lifestyle. Calcium is the primary mineral responsible for strong bones.\* The body also uses Calcium for proper muscle contraction and nerve function.\* Because the body cannot produce Calcium, a balanced diet, regular exercise, healthy lifestyle choices and adequate intake of Calcium and Vitamin D can play a role in maintaining bone health.\* Just two tablets of Calcium 600 + Vitamin D give you 120% of the Daily Value for Calcium. We include Vitamin D to aid the absorption of this essential mineral.\*

\*\*Adequate calcium as part of a healthful diet, along with physical activity, may reduce the risk of osteoporosis in later life.
