

What Is Nitro AminoFX™?

As a hard-training athlete, Branched Chain Amino Acids (BCAAs) are absolutely critical to igniting protein synthesis, which is the process of building muscle! However, BCAAs are essential amino acids, so your body can't produce them, which means you need to take them in from external sources, such as supplements. That's why Team MuscleTech™ researchers formulated *Nitro AminoFX™*. It's a rapid-absorbing, Amino-BCAA formula super-concentrated with three amino acid blends: NanoVol BCAA, a BCAA matrix featuring a mega-dose of L-leucine plus L-valine and L-isoleucine; ArgiPro, a pre-workout pump amplifier mega-dosed with L-arginine;▲ and GlutaPro, a specialty amino acid complex with L-glutamine and taurine.

Mega-Dosed 13,500mg Amino Acid Matrix

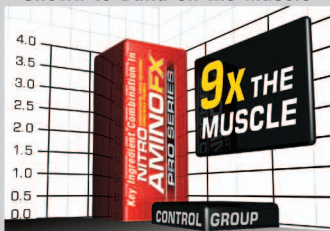

Each single-serving scoop of *Nitro AminoFX™* is mega-dosed with crystalline, ultra-fast absorbing, free-form amino acids and BCAAs. Free form amino acids are singular molecules. This means they are rapidly assimilated by your body, absorbed into your blood stream and available to muscle cells.▲

So Powerful, Results with Just 1 Scoop Daily

1 In a randomized, double-blind, third-party study conducted at the University of São Paulo with 20 subjects separated into two groups of 10, subjects using a specific key ingredient combination available in just one daily scoop of *Nitro AminoFX™* for 8 weeks gained 9 times the muscle compared to control subjects (3.72 vs. 0.41 lbs.).▲

What's truly amazing about this result is that a 12-week training program was completed before the 8-week testing period. Subjects using this ingredient combination, who weighed an average of 146 pounds at the start of the 8-week testing period, had already been training legs three times a week for 12 weeks when testing started. When they began taking the additional, specific key ingredient combination available in just one daily scoop of *Nitro AminoFX™* in combination with the same lower-body training program, they still managed to add an incredible 3.72 pounds of muscle in only 8 weeks! While the placebo group who followed the exact same training program for both the 12-week and 8-week time periods only gained 0.41 pounds in 8 weeks▲. That's 9 times the muscle!

Key Ingredient Combination Shown to Build 9x the Muscle▲

1 In a third-party scientific study conducted at the University of São Paulo with 20 subjects separated into two groups of 10, subjects using a specific ingredient combination available in just one daily scoop of *Nitro AminoFX™* for 8 weeks gained 9 times the muscle compared to control subjects (3.72 vs. 0.41 lbs.).▲
