

University Test Subjects Immediately Increased Strength by 10.5% with Their 1st Dose[▲]

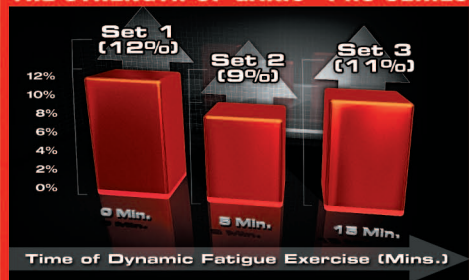

The research backing a key complex in GAKIC[®] Pro Series has been published in the journal *Medicine & Science in Sports & Exercise*.[▲]

[▲]In a randomized, double-blind, cross-over design study conducted at the University of Florida on 13 subjects, gains in total work performance during exercise were significantly greater at 0, 5 and 15 minutes for the subjects when they used a key complex in GAKIC[®] Pro Series than when they used a placebo by 12, 9 and 11 percent, respectively – an average increase of 10.5% ... all with their very first dose![▲]

Test Subjects Increased Muscle Performance by an Average of 21%[▲]

[▲]In the same study, this key complex in GAKIC[®] Pro Series also improved fatigue resistance, increasing muscle performance (force) at 0, 5 and 15 minutes by 28%, 21% and 14% more than when subjects used a placebo – an incredible average increase of 21%![▲]

THE STRENGTH OF GAKIC[®] PRO SERIES

[▲]In a randomized, double-blind, cross-over design study conducted at the University of Florida on 13 subjects, gains in total work performance during exercise were significantly greater at 0, 5 and 15 minutes for subjects when they used a key complex in GAKIC[®] Pro Series than when they used a placebo by 12, 9 and 11 percent, respectively – an average of 10.5%.
