### Scientifically Advanced Musclebuilding Creatine Formula – Builds Muscle Fast! \*\*

What Is Cell-Tech™ Hardcore Pro Series?

<sup>‡‡</sup>Creatine has been shown in numerous published studies to significantly improve strength, power, recovery time and increase lean muscle mass. However, as good as creatine is on its own, research has shown that it can be made to work even better. After extensive research and development, including testing, Team MuscleTech™ researchers engineered Cell-Tech™ Hardcore Pro Series – an advanced musclebuilding creating formula with powerful core ingredients shown to be scientifically superior and build muscle significantly faster than creatine alone. This exclusive, patent-protected formula delivers vastly superior results by rapidly saturating your muscle cells with ultra-oure, highly cotent creatine unlike anything else available. Cell-Tech™ Hardcore Pro Series is designed specifically for elite bodybuilders and athletes who want to pack on muscle and strength, fast!

ased on Rock-Solid Research at Leading Universities

A portion of every single dollar spent on MuscleTech® supplements goes back into supporting its research and development efforts, which includes funding clinical research, reviewing third-party scientific studies and consulting with leading university researchers. As such, Team MuscleTech™ researchers examined hundreds of scientific studies looking for the most powerful musclebuilding and creating-accelerating ingredients available. The key ingredients found in Cell-Tech™ Hardcore Pro Series and its core formula are supported by a total of 44 scientific studies! Groundbreaking research was conducted at multiple institutions, including McMaster University and St. Francis Xavier University. This exhaustive scientific investigation led to important discoveries, including one that other supplement companies don't want you to know about: the discovery of a truly effective means of transporting creatine into muscle cells where it is needed most to build muscle and strength. With the exclusive Cell-Tech™ Hardcore Pro Series delivery system, each serving rapidly triggers critical musclebuilding physiological elements to drive a mega-dose of creatine into your muscle cells.4

### Laboratory-Tested, HPLC-Certified Creatine & Dextrose for Rapid Muscle Gains

A core element of the musclebuilding machinery driving the Cell-Tech Hardcore Pro Series formula is derived from HPLC-certified creatine featuring Micro-Diffuse Technology™, HPLC is a biochemical analytical method used in lab testing to identify components of a compound and test for purity. To force the 10,000 mg monster-dose of ultra-potent creatine into your muscle cells where it triggers muscle growth, each serving is formulated with a precisely dosed 75 grams of laboratory-tested, HPLC-certified dextrose. This is the same amount globally recognized and used by the medical community to assess the efficiency of insulin in human subjects. A high dose of dextrose works to increase plasma glucose concentration, spike serum insulin levels and drive cellular creatine delivery and absorption. Plus. each powerful serving of Cell-Tech™ Hardcore Pro Series includes a potent 200-mg dose of Alpha Lipoic Acid.◆

### How Do You Know Cell-Tech™ Hardcore Pro Series Works?

Just take a look at the documented published research

<sup>†</sup>In a placebo-controlled study conducted at a physiology lab in Greenwich, CT, subjects taking the core formula in Cell-Tech™ Hardcore Pro Series with a hardcore training program built 26 times more mass than those taking creatine alone (4.34 vs. 0.16 lbs.).

In fact, an extraordinary test subject even gained 7 pounds in only 7 days! In the same 28-day study, subjects using the core formula in Cell-Tech Hardcore, Pro Series gained an average of 3.6 lbs. of rock-solid mass in only 7 days. That's right - one week! These documented results are a clear testimony t Cell-Tech™ Hardcore Pro Series' ability to deliver amazing gains in mass and strength, fast!A

# **MULTI-STAGE INTRA-CELLULAR ACTIVATION**

With each dose, the Cell-Tech™ Hardcore Pro Series formula simultaneously activates key biochemical elements needed for superior creatine absorption.
