

Scientifically Advanced Weight-Gain Formula

Power-Packed Formula with 70g Protein, Over 1000 Calories and 10g BCAAs When Used As Directed

¹ When mixed with two cups of skim milk, each serving of Mass-Tech® delivers 70 grams of protein, over 1,000 calories and 10 grams of BCAAs. Not all weight-gain formulas are created equal when it comes to building extreme mass. Mass-Tech® is scientifically developed to help you pack on slabs of mass fast! Mass-Tech® was designed using a scientifically studied caloric amount that's powered by a massive amount of protein and doesn't bombard you with a ton of calories from fat.

Mega-Dosed with the Most Scientifically Researched Form of Creatine Available

During the development of Mass-Tech®, Team Muscletech® researchers ensured they loaded the formula with the most scientifically researched form of creatine available. Additionally, to help increase the rate of saturation of this potent massbuilding compound into the muscles, the researchers engineered the formula with an advanced driver shown in leading university research to spike insulin. Further, Mass-Tech® includes a massive dose of protein designed to induce hyperaminoacidemia, a rapid and dramatic rise in amino acid levels, which leads to increased protein synthesis – the key mechanism that drives explosive muscle growth.*

Gold-Standard University Study! Test Subjects Gained 5 Times the Mass in 8 Weeks!¹

² In an 8-week study performed at California State University and published in the *Journal of Sports Medicine and Physical Fitness*, researchers examined the addition of 2,000 calories (over 2,600 calories are found in two servings of Mass-Tech®, when each is mixed with two cups of skim milk) to a high-protein diet containing approximately 2,300 calories and a weightlifting program. In the study, in which 73 untrained subjects were divided into three groups, subjects consuming the additional 2,000 calories gained an average of 6.8 pounds of mass while the control group gained only 1.3 pounds of mass. That's over 5 times the mass compared to control subjects! Most importantly, there was no significant increase in fat mass or abdominal circumference in test subjects during the 8-week study! That's right – NO SIGNIFICANT FAT GAIN!

³ In the same study noted above, test subjects also gained massive size where it matters most – directly on their chest and arms. They gained 1.2 inches on their chest and 0.5 inches on their arms versus the control group who only added 0.5 inches and 0.2 inches.*

It's time for you to take Mass-Tech® – the ultimate extreme weight gainer. Join countless individuals across America that have added Mass-Tech® to their training programs to help rapidly morph their physiques with thick, dense mass, today!*

MASS-TECH®

SCIENTIFICALLY ADVANCED WEIGHT-GAIN FORMULA*

• Power-Packed with **70g Protein**, Over **1000 Calories** and **10g BCAAs** When Used As Directed¹

• Mega-Dosed with the Most Scientifically Researched Form of Creatine Available*

• Gold-Standard University Study! Test Subjects Gained 5 Times the Mass in 8 Weeks*²

• Test Subjects Also Added Dense Size Directly to Their Chest & Arms*³

Results based on caloric intake testing.
See back panel for study details.

UNBELIEVABLE TASTE!

VANILLA MILKSHAKE
NATURAL & ARTIFICIAL FLAVORS • ZERO ASPARTAME!

DIETARY SUPPLEMENT NET WT. 5 LBS. [2.3kg]
