Eco-Friendly. Krill is one of earth's most abundant and sustainable organisms. The harvest of krill is well below conservative international catch guidelines.

MegaRed® goes a step further by only sourcing krill from the Antarctic where krill is most abundant. This helps the ecosystem maintain a healthy, sustainable krill population.

May Reduce the Risk of Coronary Heart Disease†

Schiff® MegaRed® contains oil from 100% pure Antarctic krill, tiny crustaceans that thrive in the frigid waters of the Antarctic.

MegaRed® provides an optimal combination of omega-3 fatty acids, phospholipids and the powerful antioxidant astaxanthin to support heart and joint health.* Just one small, easy-to-swallow MegaRed® softgel to take each day. Quality tested for purity.

MegaRed® Omega-3 Krill Oil contains omega-3 fatty acids DHA and EPA. Research has shown that DHA and EPA may reduce the risk of coronary heart disease.† Unlike fish oil, the omega-3 fatty acids in MegaRed® Omega-3 Krill Oil are mainly absorbed and carried to your body's cells in phospholipid form.

Phospholipids form the structural basis of cell membranes, so MegaRed® phospholipids, with omega-3 fatty acids, are easily recognized, incorporated and utilized by your body.

Importantly, because MegaRed® omega-3s are carried in phospholipid form, there is no fishy aftertaste.

MegaRed® has been shown to significantly increase your Omega-3 Index in just 30 days.† The Omega-3 Index is a measure of the amount of omega-3 fatty acids in your body's cells. A higher Omega-3 Index is associated with better cardiovascular health and other health benefits.
