In order for Omega-3s to be put to good use, they must first be absorbed by your body. Traditional fish oil floats on top of your stomach, giving that unpleasant fishy aftertaste.

MEGARED® OMEGA-3 KRILL OIL IS DIFFERENT. ITS OMEGA-3s ARE CARRIED IN PHOSPHOLIPID FORM, SO IT:

- Easily mixes in the stomach and doesn't leave an unpleasant aftertaste.
- Is easily recognized and utilized by your body's cell membranes, which are also phospholipid, allowing easy absorption.
- Just one small pill with no fishy aftertaste, that's why **MegaRed® Omega-3 Krill Oil** is the superior choice.

† Supportive, but not conclusive research shows that consumption of EPA and DHA Omega-3 fatty acids may reduce the risk of coronary heart disease.

Eco-Friendly. Krill is one of earth's most abundant and sustainable organisms. The harvest of krill is well below conservative international catch guidelines.

MegaRed® goes a step further by only sourcing krill from the Antarctic where krill is most abundant. This helps the ecosystem maintain a healthy, sustainable krill population.
