MOAB is a patent pending, ultra high tech advancement in foundation sports nutrition that supports dramatic and continuous muscle pumps, anabolic potential and red blood cell building. MOAB is designed to promote the build up of nitric oxide in the system with a unique time release blend, plus additional anabolic and hematopoietic stimulating co-factors. Muscles and blood vessels become saturated with these compounds, which elicits dramatic muscle engorging effects. Once you start using it, you will immediately feel the difference.*

THE WARFARE STACK: [wor•fär][stak] *adj.* Descriptive phrase used to describe a cutting edge, highly explosive muscle growth munitions stockpile that may detonate upon contact.
