30 Day Supply

TriActive Biotics Daily Care Featuring

TriActive Biotics Bac5 Activity is a process by which the prebiotic is delivered to the acidic environment of the stomach to balance the pH, and discourage the growth of unfriendly bacteria. It also causes bacterial multiplication for the protected probiotic blend, which is delivered safely to the intestine through microencapsulation. *Microencapsulated probiotics have been shown in human clinical trials to colonize/adhere up to 5x better than typical or uncoated strains.*

SIMPLY PUT...

6 Billion CFU of
TriActive Biotics DC,
is equal to or greater
than 30 Billion CFU of
uncoated strains!
