COCONUT MILK POWDER

The coconut has long been a revered source of wholesome nutrition. The flesh contains a wide range of vitamins, minerals, electrolytes, and medium chain saturated fatty acids (MCFAs), which are readily used by the liver and help support improved energy and thermogenesis. Our Coconut Milk Powder is a great tasting, vegan alternative to animal milk and is a long-lasting, portable choice in place of fresh coconut milk.†

To use, add 1 heaping tablespoon (6g) to water until it reaches desired consistency. To make "light coconut milk" mix 1/2 cup (40g) of coconut milk powder with 1 cup warm water. To make "coconut cream" mix 1.5 cups (120g) coconut milk powder with 1 cup of warm water.

Vegan • Gluten-Free • Chemical-Free • Non GMO

WHO SHOULD USE COCONUT MILK POWDER?

This is perfect for vegans, those who are lactose-intolerant, or anyone looking for an easy-to-use alternative to fresh coconut milk.†
