

DIRECTIONS: Take two capsules twice daily, or as directed by your healthcare practitioner.

MedCaps DPO™ is a comprehensive, hepato-supportive formula with ingredients known to modulate the activities of phase I (CYP) enzymes, as well as the activity of a variety of phase II enzymes (hence the term "Dual-Phase Optimizers"). This unique formula also provides activated B vitamins methylcobalamin, pyridoxal 5'-phosphate, and 5-methyltetrahydrofolate (5-MTHF) to enhance clinical effectiveness. 5-MTHF can overcome issues of altered folate metabolism, while the Quatrefolic®† form ensures exceptional bioavailability. MedCaps DPO also provides a variety of antioxidants to minimize the damaging effects of free radicals generated between the two phases. Enhanced support for phase II glucuronidation is provided with the addition of calcium D-glucarate. Optimal detoxification is critical to overall health and vitality.*
