AnaMAX-24™

MRI

ANABOLIC SWITCH

MULTI-PHASIC ANABOLIC CREATINE

The Ultimate Size Formula* Fast-Acting Anabolic Creatine* All Day Anabolism* **Employs 7 Forms of Creatine** Only 1 Gram of Sugar

FRUIT PUNCH NET.WT. 2.0 lbs. (907 a) EXTENDING YOUR TIME IN ANABOLISM
MRI's New Creatine "Sequential Wave" Technology

CREATINE'S ANABOLIC PHASE (CAP)

Anabolic-Switch precisely "links" the anabolic phase of all 7 types of creating (Cr1-Cr7) round in its formulation. You'll notice how at the precise point one creating starts to fade, the next creating begins to spike. This new multi-phasic "Sequential Wave" technology keeps your body anabolic all day long.

THE A WANTAGE

Anabolic Switch is the first and only bona fide anabolic creating. Unlike regular creatines that only enhance strength, Anabolic Switch teeps your body in power anabolism, in addition to ramping up strength, all day long. Plus, you get all 8 essential aminos necessary for complete anabolism.^*

THE SCIENCE

Anabolic Switch employs AnaMax-24™, the new anabolic "Sequential Wave" delivery technology, Anabolic Switch connects in series - the anabolic phase of all 7 types of creatine found in its formulation. That's how Anabolic Switch extends your body's Total Time in Anabolism (TTA), With Anabolic Switch, you get maximum gains in size and strength.^*

FAST ACTING, LONG LASTING

Anabolic Switch comes on fast and lasts all day long. In fact, your body experiences the first "anabolic wave" within minutes after dosing, as creatine #1 releases fully into your blood stream. Anabolic Switch then maintains the anabolic rush throughout the day as each successive form of creatine enters the blood stream in precisely timed intervals.*

IT'S YOUR BODY. MAKE THE ANABOLIC SWITCH Use in conjunction with your exercise routine. "Graphic representation of proposed PK profile. PREPARATION: Mix 1 serving (3 scoops) of Anabolic Switch in 8 oz. of cold water. Consume

Take 2 servings daily, dosed as follows:

ON TRAINING DAYS: Take one serving BEFORE

your workout. ON NON-TRAINING DAYS: Take one serving in the morning and the second serving 12 hours later FOR BEST RESULTS: Cycle Anabolic Switch "ON

NOTE: Do not take ester creatine (such as CE2*) with Anabolic Switch during the "ON" cycle. It is reommended to take CE2 during the "OFF" cycle.

WARNING: Do not use if you are pregnant nursing, at risk for or suffer from renal-(kidney) or hepatic (liver) dysfunction. Do. not use if you suffer from diabetes or if you are prone to hyperglycemia or hypoglyce mia. Do not use if you have been prescribed and are taking Disulfiram (Antabuse), or if you have a known hypersensitivity to any of the components in creatine or ethyl alcohol. Not intended for use by individuals under the age of 18 years. Maintain an adequate state of hydration during use. If you experience a skin rash or any other allergic reaction, discontinue use and
