

Maintain pH Balance in the Body—The most important nutrients in our bodies for maintaining acid-base balance are minerals like those found in Concentrace®.*

Hair and Skin—Use internally to nourish from within, externally as a rub (Very concentrated. Must be diluted. Keep out of eyes or areas of broken skin unless highly diluted).*

Helps Normalize Bowel Functions—Cleansing.*

Calcium Assimilation—Reports show that calcium assimilates much better when taken with magnesium. Concentrace® is high in magnesium.*

Circulatory Health—Minerals play important roles in decalcification, antioxidant, and cleansing functions in the body. The heart requires magnesium with every beat. Potassium is used to contract the heart muscle.*

Vitamin Enhancement—Complete nutrition is more powerful nutrition. Vitamins without minerals DO NOT work. Trace minerals help assimilate vitamins.*

Gardens and Plants—A study done by Rutgers University and other studies done by the USDA noted the severe mineral imbalance and depletion in American soil. For years many avid gardeners

have used Concentrace® on their gardens as well as in the flower beds. It is also very beneficial to house plants when diluted with water. See the difference in your plants.

Pets—Ever noticed your pet eating grass or dirt? More than likely your pet is lacking essential minerals. For years, pet owners have added Concentrace® to their pet's food and water.

Athletic performance—There are many examples of improved athletic performance, including increased stamina, reduced cramps, improved hydration, heightened endurance, and improved cardiovascular performance.*

Body Building—A study of a number of international body builders using Concentrace® reported excellent results.*

Add to Carbonated Beverages—A recent study has shown that a few drops per glass balances soda drinks to greatly reduce the potentially harmful effects of carbonation.

Cooking—Studies show mineral depletion in our soils. Frankly, we are not getting the minerals in the foods we eat. Concentrace® re-mineralizes these foods and adds flavor.*

Supplement Facts

Serving Size ½ tsp. (about 40 drops),
Servings Per Container 6, Amount per
serving (%DV age 2-3, age 4 or
more): Magnesium 250 mg (125%,
63% DV), Chloride 650 mg (**, 19% DV),
Sodium 5 mg (**, <1% DV), Potassium
3 mg (**, <1% DV), Sulfate 40 mg**,
Lithium 1.5 mg**, Boron 1 mg**.

**Daily Value (DV) not established.

Ingredients: Ionic sea minerals from the Great Salt Lake in Utah, USA. Contains no other added ingredients.

This product contains over 72 ionic trace minerals in varying trace amounts as found in seawater, including those listed above as well as the following: Calcium, Silicon, Selenium, Phosphorus, Iodine, Chromium, Manganese, Iron, Copper, Molybdenum, Zinc, Vanadium. For additional information, including a complete list of trace minerals contained in this product, please visit www.traceminerals.com.

NON-GMO, CERTIFIED VEGAN. Approved for use as an organic food additive and processing additive.

Allergen Info: contains no known allergens. **GLUTEN FREE.**

Suggested Use: DO NOT DROP PRODUCT IN EYES. This product is all natural, highly concentrated, contains no added preservatives, flavors, or sweeteners and has a very strong taste. We recommend mixing it with juice or food and dividing the serving throughout the day to mask the concentrated mineral flavor. Begin regimen by taking 10 drops for 3 consecutive days. Each day thereafter, increase serving by 10 drops up to ½ teaspoon (40 drops) once or twice daily. **Children age 2-3:** Take 1 drop for every 5 lbs of body weight. **For regular or sodium restricted diets.**

Re-mineralize Water: Improve the flavor of distilled, reverse osmosis or purified water. Adding 20-40 drops per gallon or to taste (2-4 drops per glass) compares to expensive mineral water. Minor crystallization may occur, but this does not affect the quality of the product.

ConcenTrace® Trace Mineral Drops is an all natural mineral concentrate that's made by using **ConcenFio™**, our proprietary harvesting process. **ConcenTrace®** contains over 72 naturally occurring ionic trace minerals from the Great Salt Lake with 99% sodium removed.

Ideally, minerals should come from eating a raw food diet. However, even eating a raw food diet isn't enough since researchers have proven that soils have been depleted of minerals. Therefore, if it's not in the soil, it's not in the food. Here's where **ConcenTrace®** comes in—taking **ConcenTrace®** every day ensures you're getting a full spectrum of ionic trace minerals, which are the same kind of bioavailable ionic trace minerals that are found in foods!*

USES & APPLICATIONS OF CONCENTRANCE®

Magnesium Supplement—One of the highest quality, least expensive, and most assimilable magnesium supplements on the market.*

Bone, Joint & Health—Taken as directed, many people have experienced dramatic results in improving and strengthening bones, joints, and teeth and eliminating unwanted calcium deposits.*

Re-Mineralize Distilled Water—¼-½ teaspoon per gallon for a fresh spring water taste.

Electrolyte Replacement—Increased energy, vitality, and improved health by replacing and balancing soluble minerals in the body's fluids. Soluble minerals are the electrolytes which conduct the body's electrical energies.
