Selenium 55 mcg	79
Copper 2 mg	100

Lutein is a beneficial pigment found in vegetables such as corn, squash and spinach. Studies have shown that lutein may play an important role in maintaining the health of the macula, in the eye. The macula functions in a high-activity vision.* The lutein in this formula is extracted from marigold flowers. Lutein works with antioxidant vitamins C, E and A (as beta-carotene) to help maintain eye health.* Other essential nutrients such as copper, selenium and zinc are part of this specialized formula.
